

Health and Safety Policy

Manluk is committed to the protection of accidental loss from all its resources, including employee and physical assets.

In fulfilling this commitment to protect both people and property, management will provide and maintain a safe and healthful work environment for the prevention of work-related injury and ill health, in accordance with industry standards and in compliance with applicable legal and other requirements. We are committed to continually improving and maintaining the Occupational Health & Safety System. We will strive to eliminate foreseeable hazards and reduce OH&S risks which may result in property damage, accidents or personal injury or illness.

All employees will be equally responsible for minimizing accidents within our facilities. Safe work practices and procedures will be clearly defined in the Safety Manual for all employees to follow.

Accidental loss can be controlled through good management in combination with active employee involvement through consultation and participation. Safety is the direct responsibility of all managers, supervisors and employees.

It is our objective that all management functions will comply with legislative safety requirements as they relate to the planning, operation and maintenance of facilities and equipment. All employees will perform their jobs properly in accordance with established procedures and safe work practices. Together, through leadership, consultation, participation and personal commitment, we will continue to make health and safety a way of life throughout the Manluk Group of Companies.

Frank Luebke
